Index of Authors (with titles)

Abbing, M.R., see Roobeek, A.
Al-Maliki, I., see Banerjee, S.K.
Azar, I., and Weston, R.H.; A vision reference model for systems integration, 234
Banerjee, S.K., and Al-Maliki, I.; A structured approach to FMS modelling, 77
Barkmeyer, E., see Libes, D.
Chryssolouris, G., and Gruenig, I.; On a database design for intelligent manufacturing systems, 171
Coutts, I., see Weston, R.H.
Davis, W.J., and Jones, A.T.; A real-time production scheduler for a stochastic manufacturing environment, 101
Gandhi, M.V., see Grippo, P.M.
Gascoine, J. D., see Weston, R. H.
Graves, G.R., Yelamanchili, B., and Parks, C.M.; An interface architecture for CAD/CAPP integration using knowledge-based systems and feature recognition algorithms, 89
Grippo, P.M., Thompson, B.S., and Gandhi, M.V.; A review of flexible fixturing systems for computer integrated manufacturing, 124
Gruenig, I., see Chryssolouris, G.
Harhalakis, G., Ssemakula, M.E., and Johri, A.; Functional design of an integrated CIM system at the facility level, 245
Heide, J., see Young, R.E.
Hodgson, A., see Weston, R.H.
Hübner, M., see Meyer, W.
Hübner, M.; Knowledge-based configuration of flow lines, 210
Isenberg, R., see Meyer, W.
Johri, A., see Harhalakis, G.
Jones, A.T., see Davis, W.J.
Jones, D.A.; A prototype expert system for manufacturing resource planning, 165
Judd, R., see Parunak, H.V.D.
Leonard, R.; Elements of cost-effective CIM, 13
Libes, D., and Barkmeyer, E.; The integrated manufacturing data administration system (IMDAS)—an overview, 44
Maimon, O.; IMAC—An industrial material activity controller for electronic FMS, 113
Mandutianu, D., and Voinea, S.; Knowledge based processes in flexible manufacturing, 197
Meyer, W., Isenberg, R., and Hübner, M.; Knowledge-based factory supervision—The CIM shell, 31
Parks, C.M., see Graves, G.R.
Parunak, H.V.D., and Judd, R.; LLAMA: A layered logical architecture for material administration, 222
Pourbabai, B.; Components of a decision support system for computer integrated manufacturing, 253
Ranky, P.G., A real-time, rule-based FMS operation control strategy in CIM environment—Part I, 55
Ranky, P.G., A real-time, rule-based FMS operation control strategy in CIM environment—Part II, 185
Rogers, P., and Williams, D.J.; Knowledge-based control in manufacturing automation, 21
Roobeek, A., and Abbing, M.R.; The international implications of computer integrated manufacturing, 3
Rui, A., see Weston, R.H.
Salvendy, G., see Tabe, T.
Ssemakula, M.E., see Harhalakis, G.
Sumpter, C.M., see Weston, R.H.
Tabe, T., and Salvendy, G.; Toward a hybrid intelligent system for scheduling and rescheduling of FMS, 154
Thompson, B.S., see Grippo, P.M.
Vesterager, J., see Young, R.E.
Voinea, S., see Mandutianu, D.
Weston, R.H., Gascoine, J.D., Rui, A., Hodgson, A., Sumpter, C.M., and Coutts, I.; Steps towards information integration in manufacturing, 140
Weston, R.H., see Azar, I.
Wichmann, K.E., see Young, R.E.
Williams, D.J., see Rogers, P.
Yelamanchili, B., see Graves, G.R.
Young, R.E., Vesterager, J., Wichmann, K.E., and Heide, J.; Simulation uses in CIM development, 50
